WHO'S WHO IN PHILOSOPHY is being published to fill a long-felt need for biographical data and a bibliographical record of the published books and major periodical contributions of living philosophers. The book has been planned in two volumes: Volume One, to cover the Anglo-American philosophers; Volume Two, philosophers in the non-English speaking countries. In view of the present world situation, however, publication of the second volume will be postponed until after the emergency when philosophers can again function as true seekers of wisdom.

One of the major aspects of WHO'S WHO IN PHILOSOPHY is the recording of doctoral dissertations. This is the first time in the history of philosophical bibliography that such records will be available in one volume.

I wish to take this occasion to thank the various philosophical associations, their officers and their members, for their co-operation.
